Gaming Microphone Maono DGM20 (black)

Maono DGM20 Gaming Microphone (Black)
Maono DGM20 not only impresses with its Plug and Play simplicity and compatibility with various platforms but also offers advanced sound quality control through a precise control panel. The visual attraction is the lighting options that add a unique character to every session. The complete set with an anti-vibration basket and pop filter ensures crystal-clear sound, free from unwanted vibrations and noise.

Plug and Play – Compatibility and Ease of Use
The Maono DGM20 microphone is synonymous with user convenience. Designed for users of different systems, it seamlessly works with Windows, MacOS, and PS4/PS5 consoles. With Plug and Play functionality, users can start using the microphone immediately after connecting it, without the need to install additional drivers or software. This is a key feature that allows you to focus on gaming or streaming rather than technical configuration aspects.

Sound Level Control
With full audio control in mind, the Maono DGM20 is equipped with an intuitive dial at the base, allowing for quick and precise adjustment of sound capture levels. This feature enables users to dynamically manage volume in real-time, which is invaluable during live sessions where acoustic conditions can change rapidly. Adjusting settings without taking your eyes off the screen is a comfort appreciated by

every gamer.

Touch Panel
The modernity of the Maono DGM20 microphone is also evident in the touch panel located on the top of the device. It allows for easy management of lighting, muting the microphone, and eliminating ambient noise, such as those generated by a keyboard. Additionally, the LED indicator, changing colors based on the device's status, provides immediate visual feedback, especially useful in a dark gaming room.

Lighting – Personalization
The DGM20 gaming microphone takes personalization to a new level, offering numerous lighting options to customize the device's appearance according to individual preferences. Users can choose from 7 static colors, 7 types of pulsating lights, and 5 types of gradients, as well as the option to turn off the lighting. These options not only add charm to gaming sessions but also allow for expressing personal style.
