Nitecore P20iX Flashlight

Nitecore P20iX is a rugged tactical flashlight that shines up to 4000lm and offers several modes to choose from. You can also adjust its brightness and use the Strobe Ready feature. You'll also find several practical accessories included. The long-lasting battery provides a runtime of up to 350 hours, and the robust design and IP68 water resistance allow you to use the flashlight in almost any situation. ATR technology makes the device automatically adjust its operation depending on the environmental conditions.

Impressively powerful

The flashlight is equipped with 4 LEDs CREE XP-L2 V6, which makes its brightness reaches 4000lm, and the range is up to 221m. The device is ideal for tactical operations, search and patrols. It is also suitable for self-defense. It provides direct access to the highest brightness level (Turbo) or the Strobe function, which provides bright light flashing at a random frequency. This allows you to quickly blind and disorient a possible attacker.

2 available modes

The P20iX can operate in 2 modes, which are perfect for different applications. The Daily mode allows for 6 levels of brightness

adjustment and offers a Strobe function. It's great for everyday use. Tactical mode can be successfully used during tactical operations and self-defense. You can choose from 4 brightness levels and the Strobe function is also available. In addition, in Daily mode, the flashlight remembers the last used settings. When you run it, it will automatically adjust the brightness level or turn on the Strobe function.

Long runtime - convenient charging

The included 21700 i Series battery provides a long runtime of up to 350 hours at the Ultralow brightness level. This means that a fully charged P20iX can last you up to 14 days! The flashlight also has a built-in USB-C port for convenient charging. A special cover prevents dust, water, and debris from entering it. The device also has a small indicator light that indicates battery voltage.

Solid and durable

The flashlight is made from a durable aluminum alloy, and a hard anodizing process (military grade HA III) was used to finish it. It is characterized by incredible durability. It is IP68 water resistant and can be submerged to a depth of up to 2m. It also stands out for its ability to withstand drops from a height of up to 2m. It also gets reverse polarity protection. Moreover, the advanced DC circuit makes the device serve you well for a long time, and it is completely safe to use it.

User-friendly

The device is light and handy - it weighs just 116g and feels great in the hand. It is equipped with a strike bezel made of durable materials with high hardness, which is ideal for self-defense, among other things. You can also use it to break glass, for example. Thanks to the smooth surface you do not have to worry about accidentally scratching your backpack or clothes. Moreover, buttons located in an easily accessible place allow you to operate the flashlight conveniently.

Useful accessories

In the kit you will find several practical accessories that will make using the flashlight even more convenient. These include a tactical holster, a lanyard, an extra magazine for CR123 batteries, a spare O-ring seal and a clip that allows you to attach the device to a pocket or belt. The product is also compatible with other accessories that are available for purchase separately - such as various mounts and brackets, a remote switch, a signal light, a fast charging system and a diffuser.
