Maono DGM20 Gaming Microphone (white)

The Maono DGM20, not only impresses with its plug-and-play simplicity and compatibility with a variety of platforms, but also offers advanced control over sound quality with its precision control panel. A visual highlight are the lighting options that add a unique touch to any session. Complete with an anti-vibration basket and pop filter, it provides crystal-clear sound without unwanted vibration and noise.

Plug&Play - compatibility and ease of use

The Maono DGM20 microphone is synonymous with convenience of use. Designed with users of various systems in mind, it works seamlessly with Windows, macOS and PS4/PS5 consoles. Thanks to its plug and play feature, users can start using the microphone immediately after connecting it, without having to install additional drivers or software. This is a key feature that allows users to focus on gaming or broadcasting rather than the technical aspects of setup.

Audio level control

With full audio control in mind, the Maono DGM20 is equipped with an intuitive knob at the base, allowing quick and precise adjustment of the sound collection level. This feature allows users to dynamically manage volume in real time, which is invaluable during live sessions where acoustic conditions can change rapidly. Adjusting settings without having to take your attention away from the screen is a convenience that any gamer will appreciate.

Touch panel

The modernity of the Maono DGM20 microphone can also be seen in the touch panel located on top of the unit. It allows you to easily manage the lighting, mute the microphone and eliminate ambient noise, such as that generated by the keyboard. In addition, an LED that changes colors depending on the device's status provides instant visual feedback, which is especially useful in a darkened gamer's room.

Lighting - personalization

The DGM20 gaming microphone takes personalization to a new level, offering numerous lighting options to customize the appearance of the device to individual preferences. Users can choose from 7 static colors, 7 types of pulsating lights and 5 types of gradients, and also have the option to turn off the lighting. These options not only add charm to your gaming sessions, but also allow you to express your personal style.
