Waydoo Subnado underwater scooter - starter kit

Explore the fascinating underwater world in a whole new way! The Waydoo Subnado submersible scooter will give you an unforgettable experience in the water. It's lightweight and compact, so you can easily transport it, and its simple operation makes it successful for children as well. Easily traverse underwater spaces using the intuitive controls and choosing from 3 speed levels. In addition, the device supports fast charging and offers a powerbank function. With Subnado your underwater adventures will be even more exciting!

Lightweight, portable design

Subnado underwater scooter can accompany you almost anywhere. It weighs only 1.4 kg and its dimensions are only about 38 x 6 cm - transporting it won't be a problem! Just pack it in your backpack or travel bag and take it with you on your next trip. What's more, the device's battery has a capacity of 98 Wh, so you can also carry it with you on a plane. Travel where you want and how you want - with Subnado you will forget about limitations.

Intuitive control

Free your hands and get carried away on an underwater adventure. The innovative design of the scooter allows you to steer it smoothly and freely using just your fingers - find out how easy and convenient it is. It does not require any specialized training - just a little practice is enough! With Subnado, exploring underwater spaces becomes more enjoyable than ever before. Don't you have the proper

credentials and certifications for diving? Or maybe you just want to actively spend time with your kids? No problem - Subnado will also be perfect for a regular swimming pool, making swimming easy and lots of fun. It is also great for snorkeling. Importantly, the scooter will also be safely used by children.

Quick assembly system - plenty of possibilities

Forget about the complicated and time-consuming installation of the necessary equipment! Thanks to the quick mounting system, the Subnado scooter can be up and running in no time, and you'll be ready for your next underwater journey in just a few moments. There are also a variety of adapters that allow you to attach the device to your arms or legs, for example. The choice is yours!

Capture memories of your underwater adventure

Record your underwater adventure and revisit its most memorable moments not only in your memories! You have a special mount (1/4-20 UNC) that allows you to mount up to 3 accessories on your scooter, such as a GoPro camera and additional lighting, for example. Take advantage of this possibility and prepare one-of-a-kind footage!

Dive even deeper - improved power system

Swim with or against the current without the slightest effort. The Subnado is equipped with an aluminum alloy housing and an improved drive system, allowing it to reach speeds of up to 1.4 m/s (forward). Unleash an impressive speed and experience the thrill! However, that's not all - the scooter allows you to plunge as deep as 60 m, which means that advanced divers will also successfully use it. What makes the Subnado able to provide such excellent performance? The scooter uses a 4-blade propeller, so it offers up to 23% more efficiency compared to standard 3-blade solutions. It has also been equipped with specially designed stator blades, which have allowed the propulsion system to increase its capabilities by about 5%.

Fast charging, powerbank function

Thanks to Waydoo's patented technology, it takes only about 1.2 hours to charge the scooter from 0% to 100%. You won't have to wait too long until it's ready for your next underwater expedition! In turn, its operating time is up to 56 minutes. But that's not all - the device can also act as a powerbank. With its help you can charge your smartphone or laptop with up to 100 watts of power.
