Ref: 6975253972661

Car Charger 1xUSB-A 1xUSB-C 45W Essager (black)

Car Charger 1xUSB-A 1xUSB-C 45W Essager (black)

Enjoy navigation without worrying that your phone will discharge at the wrong time. The Essager car charger is equipped with 2 ports (USB-A and USB-C), and its power reaches up to 45W, so you can successfully renew the energy of 2 devices at the same time. You will use it in most cars.

Fast charging of 2 devices at the same time

The Essager charger supports PD27W fast charging, so when combined with the fast charging cable, it allows you to charge your iPhone 13 Pro Max up to 60% from half an hour. 30 minutes is also enough for the Samsung S22 Ultra's battery charge level to reach 55%. The presence of 2 ports (USB-A and USB-C) saves time - say goodbye to limitations and renew the energy of 2 smartphones or a smartphone and a tablet at the same time!

Solutions for security

Essager cares about the safety of your devices, which is why the charger is equipped with a smart chip that provides a number of safety features, including overcharging, overloading, short circuit, overheating and overpressure. In addition, an aluminum alloy and ABS were used in the manufacture of the product to ensure that the optimal temperature is maintained during charging.

Refined in every detail

Save space in your car and bet on the Essager charger, which allows you to connect 2 devices simultaneously. The device supports Plug and Play, so you don't need to install additional drivers to use it. In addition, thanks to its compatibility with a voltage range of 12-24 volts, the product will work well in most vehicles.
