Cordless Screwdriver Hoto QWLS008

Torque of 5 N·m, powerful motor with speed of 200 rpm and long working time are the main advantages of Hoto QWLS008 screwdriver. The device is easy to use and thanks to its ergonomic design it provides comfort of use. It has a rechargeable battery with a capacity of 2000 mAh and when fully charged it allows you to screw in up to 300 screws. In the set you will find 10 different bits made of S2 steel and a carrying case.

Powerful work

The Hoto QWLS008 screwdriver is equipped with a motor that delivers up to 5 N·m of torque and runs at 200 rpm, guaranteeing stability and high efficiency. Moreover, the screwdriver is extremely durable and resistant to wear, so it will serve you for an extremely long time.

Ideal for beginners

QWLS008 has been designed to ensure high user comfort and simple operation. It has a large button that allows you to operate the device conveniently. Just push it up to start screwing or down to start unscrewing. There is also a middle button at your disposal which is used to lock the screwdriver.

High level of working comfort

The ergonomic design means that even long hours of use do not cause fatigue or discomfort. The screwdriver weighs just 365 grams and lies perfectly in the hand. The high-quality materials are not only durable but also pleasant to the touch, and the LED backlighting makes working in the dark easier. The screwdriver also comes with a carrying case, which is useful for transportation.

10 practical bits

The set includes 10 bits with a diameter of 50 mm, so that the screwdriver can be used for many different purposes. They have a hardness of 60 HRC and are made of high-quality S2 steel, which makes them durable and wear-resistant. They can be used for small repairs to appliances and toys, assembling furniture and much more.

Durable battery

The Hoto QWLS008 screwdriver has a powerful 2000 mAh battery. So it can work wirelessly, and you can reduce the number of cables while working. When fully charged, the device can screw in up to 300 screws, so you don't have to worry about it draining too quickly. The built-in USB-C port ensures safe energy renewal, plus the device is protected against short circuit, overvoltage and overheating, among other things.
