

Electric Router Deko Tools DKER8

Electric Router Deko Tools DKER8

Ref: 6974491581673

Deko Tools DKER8 electric router

The Deko Tools DKER8 router is a great choice for all-purpose routing and trimming. It offers 7 speed adjustments so you can tailor its operation to your specific requirements. Its smart design makes it comfortable and efficient to work with.

Speed adjustment

Working on different materials requires router to be adjusted. Choose from 7 speed settings within the 16000-30000 rpm range to optimize your work and achieve the desired result more quickly and safely.

Well thought-out design.

The ergonomic design of the router considerably improves working comfort and efficiency. Its transparent plastic cover ensures full visibility of the blade so that you can operate it with great precision. What's more, a special adapter allows you to change the carbon brush in no time.
