Deko Tools Random Orbit Sander DKWP180CD

The random orbit sander by Deko Tools is ideal for sanding various types of walls. It boasts 900W of power and allows you to adjust the speed up to 2700rpm. The dust-suction system reduces the mess during the renovation, and the removable cover allows you to sand the edges of the walls without any problems.

Speed adjustment

Adapt the sander to your needs. The sander has a 5-stage speed control with a range of 1400-2700rpm. Speeds 1-3 are perfect for softer materials which are easy to sand. For sanding hard walls, speeds 3-5 are more suitable.

User-friendly

Do you also want to smooth out the edges of walls? Simply remove the side cover of the sander. Changing sanding paper is no problem either, thanks to the special hook-and-loop fastener. The machine also has a dust-suction system, which significantly reduces dust. It is also easy and convenient to use.
