2-in-1 electric razor and nose trimmer Kensen

Kensen electric razor and nose trimmer 2-in-1

With the Kensen device, you will not only take care of your beard, but also get rid of unsightly hair all over your body. The electric razor has an interchangeable head, so the device also acts as a trimmer. You can use it both dry and wet, and the cordless design makes it comfortable to use.

Various applications

The device will work well for shaving the entire body. The kit comes with a razor and trimmer head, so you can get rid of unsightly hair with one device. Moreover, in the package you will also find 4 comb attachments (1/2/4/6 mm), thanks to which you will adjust the work of the device to your needs.

Efficiency and precision

The product has a powerful motor that operates at 220 cuts per second. As a result, you can enjoy a fast and accurate shave. Moreover, thanks to its well-thought-out design, the razor doesn't cause any pulling or cutting sensation.

Convenient charging

The electric razor is equipped with a 600 mAh battery, which translates into about 35 days of use on a single charge (if you use the

device for 2 minutes every day). To renew the product's energy, connect it to a power source using the USB-C cable (included). After 2.5 h of charging, the razor will be ready for further use.

Comfort of use

The razor has been designed to make use as comfortable as possible. In addition to this, the razor's head rotates 30°, so it adapts to the shape of the face, for greater precision. The rounded blades help avoid irritation, and the T-shaped finish of the head increases the stability of the blade.

Water-resistant

The Kensen electric razor allows you to shave dry, when, for example, you're in a hurry to get to work, or wet, for greater precision and convenience. It's also IPX6 water-resistant, so you can easily clean it and prevent the proliferation of bacteria.
