Ref: 6941237169259

Lightning to USB OTG adapter with SD / microSD card reader Joyroom S-H142

Enhance the capabilities of your iPhone or iPad. The 4-in-1 Joyroom S-H142 adapter allows you to connect a memory card or USB drive to your device, and with the OTG function, you can conveniently use a keyboard, mouse or microphone. The plug-and-play system makes the product extremely easy to use, and the compact design makes it easy for eventual transportation and storage.

Convenient file transfer and browsing

With the help of the adapter you can not only conveniently view files on your tablet or smartphone, but also transfer them in a short time. The product will allow you to connect a memory card (SD, micro SD) or USB drive to your iPhone or iPad, and then open and copy photos, videos or documents stored there. The transmission speed is up to 60MB/s. Note: memory cards in NTFS format are not supported.

OTG function - make your work easier

What else makes the Joyroom adapter capable of making your work much easier? The device supports the OTG function, which means that with its help you can easily connect a keyboard, mouse, digital camera, headphones or, for example, a microphone to your iPhone or iPad. As a result, you will expand the capabilities of your equipment and adapt it even better to your needs!

Plug&Play

The adapter is also extremely easy to use. Thanks to the Plug&Play system, all you have to do is connect it to the device of your choice - forget about time-consuming configuration! You don't need to install any application either. Now you can go through your files in a few moments and make your work easier! The adapter also allows you to use your iPad or iPhone while charging - don't worry about your device suddenly discharging! What's more, the high-quality tin-plated copper cable guarantees unparalleled transmission stability and reliable performance.
