Computer case Darkflash DLZ31 Mesh (Black)

Ref: 4710343793021

Darkflash DLZ31 Mesh computer case

Do you want to create a hardware configuration that you can play well on? Or do you plan to build a reliable computer for work? Choose the Darkflash DLZ31 Mesh computer case! The product offers space for mounting 7 120mm fans and is equipped with a graphics card holder. It also has built-in USB, USB-C and more ports. In addition, the opening transparent side panel will allow you to display selected components in an interesting way - for example, those with RGB backlighting.

The computer you need

Build yourself the perfect gaming or work computer. The case allows you to mount SSD and HDD drives, and offers space for several expansion cards, a graphics card up to 390mm in length and a CPU cooler up to 172mm high. What's more, a practical cable grommet will help you optimally organize your space, and a special slot allows you to install a GPU vertically (using a PCI-E cable). The case is also equipped with a graphics card holder.

Efficient cooling

Do you like to play dynamic games? Or do you often use demanding software? With Darkflash you get the assurance that your computer will not overheat! The DLZ31 Mesh model allows you to install up to 7 120mm fans or 6 140 mm fans. It also allows you to install 240mm, 280mm or 360mm water cooling. In addition, the case's carefully thought-out design guarantees fast and efficient heat dissipation.

Even more conveniences

With the help of the Darkflash DLZ31 Mesh chassis, you can easily create a hardware configuration that you will enjoy using. The product is equipped with several practical ports such as USB 3.0 and USB-C, so you can enjoy fast file transfers. There are also Power and Reset buttons, as well as a headphone/speaker output and microphone input. What's more, there are removable dust filters on the top and bottom of the case - you can easily remove and clean them if needed.

Original design

The case is equipped with a transparent side panel made of tempered glass. This allows you to achieve interesting visual effects, using, for example, fans with RGB backlighting. This is a perfect solution for a gamer's room! In addition, a special handle allows you to conveniently open and close the panel, which allows you to replace selected components or clean the hardware at any time. Also noteworthy is the original front panel of the case, which gives it a unique, modern character.
