

Parking heater HCALORY HC-A22, 8.5 kW, Diesel, Bluetooth (bl)

Ref: 5905316141230

Parking heater HCALORY HC-A22, 8.5 kW, Diesel, Bluetooth (bl)

Parking heater, heater Hcalory HC-A22 (black)

Ensure pleasant warmth in your car or RV. Diesel heater will help you take care of the optimal temperature inside the vehicle and make it easier to defrost the windows. It allows you to adjust the power in the range of 6-8.5kW and is equipped with a 10-liter fuel tank. It is also distinguished by low combustion reaching about 0.1-0.64l/h. You can operate the device in 3 ways - using the app, the included remote control or the LCD panel.

It will prove itself in various applications

The product is compatible with a wide variety of 12-24V vehicles - from cars and electric cars, to trucks and campers, to yachts. So you can enjoy pleasant warmth while traveling, and you can also easily get rid of frost and ice from the windows. At the same time, the device is very easy to install and remove. If the need arises, you can easily install it in your new car!

Reliable operation

Enjoy reliable operation of the heater. The product uses volatilization technology - the fuel is first heated and then vaporized into gas using a ceramic spark plug. It is also distinguished by fast ignition and high efficiency. A large 10-liter fuel tank and a combustion rate of

0.1-0.64l/h ensure surprisingly long operating time! The device also benefits from advanced automatic control technology, which guarantees safe use.

Convenient operation

You can operate the heater in as many as 3 ways. A dedicated app provides convenient access to its most important functions, and the included remote control features a range of up to 100m. It is also possible to control the device using a special panel with LCD display. You can even adjust the temperature and power of the heater to further customize its operation to your needs. The product also offers voice messages in English, Chinese or Russian.

Environmentally friendly

Bet on eco-friendly and economical solutions. The heater uses Diesel fuel, so it can provide less combustion - this will save you money! What's more, the device is distinguished by low emissions, so it generates less pollution entering the air. It is also worth knowing that the product meets the European Euro IV standard.
