

## Docking station 5x HDD 3,5 / 2,5" Orico SATA with duplicator

Ref: 6936761850933

Docking station 5x HDD 3,5 / 2,5" Orico SATA with duplicator

### Hard disk docking station

The docking station is compatible with all types of SATA 2.5 and 3.5 inch SATA drives. Installation is done on a Plug&Play basis. The built-in cloning module allows you to duplicate hard drives without connecting it to your computer. The applied Chip JMS567 + JMB391 allows for data transmission up to 5 Gbps. Built-in blue LED informs about the current status of the device.

### Hassle-free operation

You no longer have to search for your computer every time to transport your files. The practical docking station supports the duplicator function. This allows you to transfer data between devices quickly and conveniently. So you're sure to save a lot of time. Just turn on the power, insert the source and destination drives, and press the clone mode button. The station will automatically take care of the rest.

### Built for great things

The Orico drive is capable of reading multiple drives simultaneously when connected. It supports up to 10TB of a single drive, allowing you to greatly expand the capacity of your computer. In addition, the product has compatibility with Windows, Mac and Linux operating systems and SATA HDDs. Create your own mobile database to store a wide range of photos and videos.

### External movie library

Functional equipment will come in handy for professional users, movie lovers and beginner photographers. Moreover, it can accompany you on vacation, at home and at work. You can connect the duplicator to smart TV, HD player, Tmall box and other multimedia devices to get smooth playback and enjoy movies on the big screen.
