

Smart Pet Bowl Pawbby

Smart Pet Bowl Pawbby

Ref: 6971747870864

Pawbby's smart weighing bowl for dogs and cats

Did you know that obesity in pets can lead to many unpleasant diseases? Take care of your pet's proper diet and avoid similar problems! A Pawbby brand weighing bowl will help you - the product weighs food portions with an accuracy of 1g, and the measurement results are displayed on a 3-inch LED screen. You can also choose from 4 units such as g, ml, lb and oz. Also try the Pawbby Care app, which allows you to create an optimal feeding plan for your pet.

Impressive accuracy

The bowl is equipped with a scale with a built-in sensor and anti-interference chip, so it weighs the food placed in it with an accuracy of 1g. The product also offers an easy-to-read 3-inch display, which allows you to conveniently read the measurements. You can also change the unit - available options include grams (g), milliliters (ml), ounces (oz) and pounds (lb). This means that the Pawbby bowl will work perfectly in a variety of scenarios!

Improved construction

The bowl uses high-quality 304 stainless steel, which means it can be used in contact with food. What's more, you can easily detach it from the rest of the device and wash it under running water. The product is also distinguished by its well-thought-out 7° curved design, so your pet can use it comfortably without risking back problems. The device also features a long operating time - you don't have to

change the batteries (3x AA 1.5V) too often.

Plan your pet's diet with the app

Take care of your pet's healthy diet and don't let it risk obesity. The dedicated Pawbby Care app will help you with this! Simply enter your pet's information into it and get useful tips, with the help of which you can create the right nutrition plan for him. You can also pair the bowl with your smartphone (via Bluetooth) to monitor in real time how much food your pet has eaten. Note: this feature is only available for one pet.
