Cycling Helmet with Glasses Rockbros WT027-S (red)

Rockbros WT027-S bicycle helmet with goggles (red)

Ensure your safety while cycling. The Rockbros WT027-S bicycle helmet provides unparalleled comfort thanks to its carefully considered design. It is adjustable, so you can easily adjust its size to suit your head. It also features detachable sun goggles.

Designed for your comfort

The bike helmet has been designed to provide maximum comfort even on long bike tours. It has been fitted with a special knob that allows you to adjust the size - so you can easily adapt it to your needs. It also has a detachable lining made of breathable material, which further contributes to your comfort.

Eye protection

The set also comes with special goggles with a magnetic fastening, which you can freely detach at any time. The tinted goggles are ideal for riding on sunny days - they provide effective protection from the sun's rays. They also provide excellent protection against wind and insects.

Specially designed construction

The helmet has been manufactured with attention to detail. It has up to 28 large ventilation holes to prevent overheating and excessive

perspiration. PC plastic is used for the outer part of the helmet, which is characterised by above-average hardness and high wear and impact resistance. The inner layer, on the other hand, is made of high-density EPS foam, which provides excellent impact absorption.

2 ways to wear the helmet

Wear the helmet as you like. Going for a long ride? Attach the sun goggles! You can detach them at any time if you are not using them. There is also a special detachable visor to further protect your eyes, e.g. from branches.
