Portable Power Station Allpowers S2000 AP-SS-009-BLA

Portable Power Station Allpowers S2000 AP-SS-009-BLA

Gain uninterrupted access to power, no matter where you are. The portable power station allows you to save on electricity bills and store energy in case of power failures. The Allpowers S2000 stands out with a 1500 Wh capacity and offers up to 2500 charging cycles. Thanks to multiple ports, it allows you to connect up to 11 devices simultaneously. Moreover, it is compatible with various household appliances, drones, etc. It can even charge an electric car. You can also connect solar panels to it to utilize renewable energy sources.

Reliable Power Source

Be prepared for power outages with Allpowers S2000. The portable power station operates quietly and features a lithium-ion battery with NCM cells and a 1500 Wh capacity. This translates to over 2500 cycles (80% charge) and up to 10 years of use. Moreover, the advanced Battery Management System (BMS) monitors the device's operation, protecting it from damage. The station is also protected against overheating, too low temperature, excessive discharge, overload current, short circuit, overcharge, etc. So you can use it safely and be sure it will serve you for a long time.

Broad Compatibility

The Allpowers S2000 portable power station offers ports such as x4 AC (2000 W), x2 USB-C (PD 100 W), x2 USB-A (QC3.0), x2 USB-A, and x1 car cigarette lighter socket. As a result, you can connect it to even 11 devices at the same time. It is compatible with various types of

equipment, allowing you to use it in many situations. With its help, you can power a hairdryer, lighting, induction cooker, microwave, coffee maker, or a tourist fridge. Moreover, it will charge a drone about 20 times or an electric car, allowing to travel about 12-14 km.

Convenient Charging

You can charge the Allpowers S2000 portable charging station in several ways. By connecting the product to a power socket (400 W) using the AC cable (included), charging will take approx. 4h. Additionally, you can also replenish the Allpowers S2000's energy while traveling by connecting it to a 12/24 V car charger socket. You can also use a generator to charge the station. Choose the right way for you.

Use the Power of Sun Rays

Allpowers S2000 is compatible with solar panels; to do this, connect them to the station's XT60 port. Thanks to the use of MPPT technology and 500 W power, you will charge the device in about 3 h. You can also connect the station to the power socket and solar panels at the same time, gaining a total power of 900 W - then the charging will take only 1.6 h.

Remote Control

For even greater convenience, you can control the portable power station from the app. You will pair it with the station via Bluetooth, ensuring stable and reliable connection. From its level, you will control the battery level, turn the S2000 power on/off, or adjust settings.

LCD Display

The product is equipped with an LCD display, which will provide you with the most important information about the station's operation. From its level, you will read the battery level, input and output power, overheating warning, overcharging, etc. As a result, you have access to the most important information at a glance.

Included

portable power station

AC cable

Manufacturer

Allpowers

Model

S2000

Battery

Lithium-ion NCM

Battery Capacity

1500 Wh / 405405 mAh

Number of Cycles

2500 (80%)

Dimensions

375 × 245 × 250 mm

Weight

14.5 kg

App

Yes

Input

AC 400 W (220-240 V)

Solar Input 500 W (12-70 V, 18 A max.)

Output

x4 AC 2000 W (peak power 4000 W)

x1 car cigarette lighter socket 13 V / 10 A

x2 USB-C (PD 100 W)
x2 USB-A (QC3.0)
x2 USB-A (18 W)
