Jonizing hairbrush inFace ZH-10DSG (green)

Jonizing hair brush inFace ZH-10DSG (green)

Forget about boring and monotonous hairstyles. The inFace ionizing brush will make your hair stand out with shine and freshness. Thanks to advanced thermal technology, 5 temperature levels and the action of negative ions, your hairstyle will gain volume and silky softness. What does this mean for you? A uniquely glamorous look that catches the attention of everyone around you! The device uses intelligent NTC temperature monitoring, making it completely safe to use. It takes just 10 seconds for the brush to heat up and be ready to use. In addition, it is equipped with up to 43 teeth, which allow you to smooth the hair evenly and gently.

Intelligent temperature control

When designing the inFace ionizing brush, solutions were used to make hair styling not only easy, but also safe. The device is equipped with 43 teeth that gradually change color as the temperature increases, and advanced NTC technology is responsible for intelligently monitoring the temperature and preventing overheating. From now on, you can be sure, your hair is protected and styling is effective.

Ready to go in 10 seconds

Thanks to the advanced MCH heating element, the inFace brush heats up in just 10 seconds, which is up to 3 times faster than the previous model! You don't have to waste any more time waiting - from now on you'll get the desired results quickly. Moreover, you can use the device on both dry and wet hair without any problems.

Taking care of your hair

The inFace ionizing brush will allow you to say goodbye to the problem of frizzy hair. Thanks to the action of negative ions, it effectively neutralizes static electricity. As a result, every strand of your hair will be visibly groomed and smoothed, and you will enjoy perfectly styled, shiny hair - and all day long!

Your safety is a priority

Care has been taken to eliminate the risk of burns. Each tooth of the brush is equipped with thermal insulation to prevent excessive heat, so you don't have to worry about burning your scalp or hands. For added protection, PA material has been used to ensure reliable heat conduction. All this translates into total safety of use. In addition, the device automatically shuts off after 30 minutes.

Dreamlike comfort of use

With a 5-stage temperature control (from 120°C to 200°C), you can conveniently control the styling process. In addition, the weight of the brush is only about 276 g, allowing you to use it for long periods of time without excessive hand fatigue. The 2-meter long cord rotates 360°, guaranteeing you total freedom. In addition, the device remembers the last used temperature, so you don't have to adjust it every time you use it. Let the inFace brush become your best friend for daily grooming and styling!
