Smart laser for dog / cat play Petoneer Smart Dot

### Smart laser Petoneer Smart Dot

Cats are born hunters. If you want to keep your pet entertained while helping them stay in great shape, get the Petoneer Smart Dot interactive toy. The device emits a moving laser dot that your kitty can chase - great fun for a long time! Several modes of operation, Micro USB charging, and app control make this smart laser incredibly convenient to use.

### Perfect way to kill boredom

When the cat is left alone in the house, it is not uncommon for it to get bored and start messing around. Petoneer Smart Dot helps to avoid this. The device was created to stimulate the cat's instincts and awaken the hidden hunter in the animal. It will provide your pet with great entertainment when it is left alone at home. You can set it up to keep your pet entertained at all times - your feline friend won't even notice you're gone! With this interactive companion, cats are no longer bored.

### Several modes of operation

You can choose from 3 trajectories and 3 modes for 3 different angles. This way, you can easily adjust the operation of the device to your pet's needs and habits. Got 2 cats? No problem - choose the largest work area and let your pets cheerfully and freely chase the red dot over an even larger area.

#### Set a schedule for your pet

Pair the Smart Dot with an app for even more options. This allows you to set individual play schedules for your cats, for example. Set the hours you want the device to run, as well as specific modes of operation. Surprise your pets and let them enjoy great entertainment, even when you are away from home.

#### Play together

With the application you also gain the possibility to remotely control the laser point. Modern technology ensures stable, interference-free operation. Simply move your smartphone in any direction and watch as your kitty chases the little red dot around the room. It's great fun for both of you!

#### Designed for you and your cat

What else makes the Smart Dot Petoneer stand out? Stylish, original design! The device was designed to resemble the shape of a cat - thanks to this it is immediately obvious that it is intended for your fluffy friend. Small and portable - you can freely move it and place it anywhere you want. Powered by a USB port - simply plug it into an outlet or powerbank. The almost invisible, sensitive button fits perfectly into the design of the device and ensures comfortable operation.

#### Works with TUYA

The Petoneer Smart Dot smart laser is based on the TUYA platform. This means that it is compatible with other products that use TuyaSmart. To provide you with the best user experience, the Petoneer app has been developed based on the Tuya protocol. This makes it extremely intuitive, easy to use and yet functional, providing you with a range of additional capabilities.
