

Outdoor Camera IMOU Bullet 2 PoE 2MP

Ref: 6971927234837

Outdoor Camera IMOU Bullet 2 PoE 2MP

The IMOU Bullet 2 PoE 2MP outdoor camera.

Bet on security and keep an eye on your most precious things. The IMOU Bullet 2 outdoor camera is the perfect solution for those who are often away from home and more! Fantastic image and audio quality, night vision, human motion detection in a wide field of view, and rugged construction all mean you can finally feel safe, no matter what the conditions!

You will not miss any detail

The camera is equipped with a 4-megapixel CMOS sensor, so it is capable of capturing high-quality, detailed images. The sizable sensor performs well in low-light conditions, offering night vision of up to 30 meters, so you can feel safe no matter what time of day it is.

Wide field of view

Bullet 2 is an outdoor camera that is great for monitoring larger areas. Its wide field of view with 8x digital zoom will let you have your hand on the pulse. You will always know who is hanging around your garden area!

Intelligent motion sensor

Now any movement near the camera will be recorded! The sensor sends information to your phone every time it records human movement. However, you don't have to worry about false alarms - the sensor reacts only to the human body, so animals or balls

appearing in the range of the camera won't bother you.

Robust, well-thought-out design

The Bullet 2 camera was created from high-quality materials, and it is IP67-rated against dust and water, making it a reliable guardian of your home, regardless of weather conditions. Equipped with a micro SD card slot, it offers the ability to save footage to external storage or the cloud, giving you the freedom of choice.

Quick access to the image

You can access the camera's video on your phone, so that even when you're not at home, you can check that everything is in order. With just your phone connected to the Internet, you can instantly see what's happening on your property. What's more, from within the app you can call back to the people within camera range, so you can conveniently call your household members for dinner or scare away a possible intruder! Have confidence that your home is safe!
