Flashlight Superfire EF01

The handy Superfire EF01 flashlight will find use in many situations - at home, while traveling, camping and more. It is equipped with several light sources and offers various light modes. It also has a powerful built-in rechargeable battery, and its runtime reaches 4.5 hours on a single charge. The device is also very lightweight, yet durable - you can always have it on hand.

Long working time - powerbank function

Do you need a reliable source of light on a camping trip? Or maybe your trip to the mountains has dragged on a bit and you need to return home after dark? No problem - the EF01 flashlight is equipped with a 1,000 mAh rechargeable battery that provides up to 4.5 hours of run time on a single charge. Don't worry about it draining too quickly! The device can also serve as a powerbank - if needed, you can easily charge your phone with it, for example.

Versatility

Stock up on a practical flashlight that is great for a variety of uses. The EF01 will be perfect for camping or a trip to the mountains. You will also use it on a daily basis, for example, during an evening walk with the dog or jogging. The device will also come in handy when carrying out small repairs or if there is a power failure - thanks to it you can easily find your way in the dark!

Strong light you need

Provide yourself with a reliable source of light for any occasion. The EF01 flashlight is equipped with 2 LEDs and stands out with a power of up to 10 W. You can also choose from 4 light settings. The available options are strong light (one LED), strong light (two LEDs), low light (one LED) and low light (two LEDs). So you can easily adjust the flashlight's operation to the situation and your needs!

Additional light source

This is not the end of the device's possibilities - the EF01 model is equipped with an additional light source (COB) located on the side. This allows you to provide even better illumination in any situation! What's more, the side flashlight offers 3 light modes. You can use such settings as long white light, red steady light and flashing red and blue light. Now you can easily light your way in the dark, and if needed, you will get attention and ask for help!

Improved design

The flashlight is very light and handy - it weighs only about 50 g and features a compact design. So you can always carry it with you - you can easily fit it in a backpack or even in your pocket! The device is also very durable and resistant to damage. What's more, special indicators will provide you with information about the current level of battery charge, and the built-in magnet will allow you to stably fix the flashlight in the desired place - this will free your hands and make it easier to repair your car, for example!
