Niimbot H1S wireless label printer

Ref: 6975746634151

Niimbot H1S wireless label printer

Organize your daily life with Niimbot's heat-sensitive label printer. The H1S offers many creative features that will make organizing never boring again! The product works with iOS and Android operating systems, allowing you to print labels and design right from your phone!

Creative labels

Express yourself, experiment and have fun designing beautiful labels! Niimbot printer offers more than 1,500 icons and nearly 100 different frames to create beautiful labels for gifts, notebooks, or jars of preserves. The application in which you design offers multiple languages. The H1S supports continuous and dotted label paper, giving you unlimited freedom to create and personalize your prints.

Choose your favorite roll

The H1S supports not only discontinuous paper, but also continuous paper, providing you with the ability to print long texts as well. The printer's paper is distinguished by its high durability, being waterproof and resistant to oil and scratches, so you don't have to worry about being harmed by moisture or dirt. The paper is also environmentally friendly and safe to use, so you can also label food or your children's notebooks without worry!

Heat-sensitive printing

Niimbot H1S is a unique accessory with which you can print the kind of label you need in no time. It uses the thermo-sensitive printing method, allowing you to forget about the need to replace and refill ink, providing exceptional convenience. The print resolution is 203 dpi, which guarantees clear, aesthetically pleasing labels with simple graphics, or text.

Wireless and rugged

The printer works with the device of your choice via Bluetooth, giving you full freedom when designing. It is equipped with a powerful 1000 mAh battery, so you can forget about frequent charging. You'll be able to replenish the printer's energy in just about 2-3 hours, using the USB-C cable you'll find in the package.
