Ref: 6953460596603

Mechanical gaming keyboard Motospeed K82 RGB (black)

Motospeed K82 Mechanical Keyboard

The Motospeed K82 is a keyboard without number pads. Its small size increases its mobility, so you can take it with you almost anywhere. What's more, the keyboard occupies less space on your desk, providing more room for comfortable gaming. The adjustable RGB backlighting gives it a fantastic gaming experience and the Windows key lock prevents accidental key presses and unwanted pauses in playing.

Modern design

Motospeed K82 keyboard thanks to its modern design will become an attractive decoration of every desk. With a genuine e-sports look, this timeless device surprises not only with its functionality, but also with its unique and stylish design.

True gaming backlighting

Gaming colored LED backlighting adds the vibe to the K82 keyboard. Choose from 14 modes and play at any time of the day or night without any visual problems. A multitude of backlighting colors and fantastic lighting effects make it an eye-catcher with a modern character.

Durability

The keys have a lifespan of 50000000 clicks, which makes them extremely durable. Don't worry about destroying the keyboard in the middle of an exciting game - this damage-resistant device will serve you for many years.

Get the most out of your keyboard

The keyboard has 12 function keys. You can adjust the volume, access the Internet, switch tracks and more. Don't want to accidentally turn off the game when you least expect it? Lock the Windows key and don't worry about anything.
