

Mcdodo Audio extension cable CA-0800, 1.2m (black)

Mcdodo Audio extension cable CA-0800, 1.2m (black)

Ref: 6921002608008

Mcdodo Audio extension cable CA-0800, 1.2m (black) (black).

The Mcdodo CA-0800 is a stereo audio extension cable with an aluminum finish and nylon braid. The cable has female and male DC3.5mm terminals, which will allow you to extend the distance between your headphones and the device from which you are listening to music by 1.2m. The cable has an enameled copper core, which features low resistance and no current noise. The cable has a braided nylon sheath to increase its durability.

Clear transmission

Audio transfer with high clarity and no distortion is a feature of the CA-0800. Transfer music of excellent quality.

Aluminum housing

The cable ends are equipped with an aluminum housing that perfectly protects the connectors, while resisting corrosion, material wear and featuring fast heat dissipation.

Even greater durability

The Mcdodo CA-0800 also features a nylon braid, which increases its durability and resistance to mechanical damage so that the cable can serve you for a long time.
