Ref: 6975746630030

Niimbot B1 wireless label printer (LakeBlue)

The Niimbot B1 portable thermal label printer is another model of the device that simplifies everyday tasks. It supports Bluetooth and works with iOS and Android operating systems, making it easy to design the perfect label in a width range of 15-60 mm from your phone and then print it without using ink. Get creative with your everyday tasks.

Creative designs

Niimbot B1 is an amazing tool for your creative projects. The application includes a library where you will find a wide selection of icons, tables, frames, codes and fonts from different categories. You will successfully print labels related to different needs - store tags, labels for preserves and office supplies. There are no limits to your creativity.

Use without complications

Navigating the application is a pleasure. It's just a few clicks on the screen and your label is ready. With voice recognition and QR code scanning, working with the Niimbot B1 becomes even simpler and more intuitive, especially when you need to print on a large scale. The printer supports paper rolls 15-60 mm wide, so you can print as wide as quite narrow labels for jewelry, for example.

Eco-friendly choice

The thermal printer is a great choice for those who value an eco-friendly approach to everyday life. The Niimbot B1 doesn't require ink, which means you don't have to regularly throw away used parts and buy new ones. Opt for solutions that are friendly to the environment and your wallet!

Mobility and performance

A powerful 1,500 mAh battery ensures long-lasting use, and the included USB-C cable allows for fast charging. The lightweight and compact design (293 g) makes the Niimbot B1 ideal for those who need a printer in the field.
