Waterproof Ultrasonic Peeling ANLAN ALCPJ06-02 (White)

Anlan multifunctional skin care device

Anlan Waterproof Ultrasonic Peeling Device is a multifunctional tool for comprehensive skin care. It is perfect for fighting problems such as wrinkles, blackheads, acne or insufficient hydration. With as many as 5 available functions, the device allows you to comprehensively take care of your skin. Lightweight, stylish and easy to use, it will prove indispensable on a daily basis, at home or on the go.

1 button - 5 different functions

At the touch of a button you can quickly and conveniently change the way the device works. You can select sonic mode - ideal for removing blackheads, cleansing mode, moisturizing mode, massage mode and EMS massage mode. With so many options, the product is able to meet a variety of needs and provide comprehensive care for your skin.

Ultrasonic cleansing - the reliable way to get rid of blackheads

Ultrasonic high-frequency vibrations of 24000/s penetrate the skin and act on it to a depth of up to 3-5 mm. This deep cleansing action effectively eliminates dirt. This feature works especially well in the fight against blackheads. Using the power of ultrasonic vibrations, you will ensure a clean, beautiful complexion.

Extraordinary power of positive and negative ions

In the cleansing mode Anlan Waterproof Ultrasonic Peeling Device uses the properties of positive ions to effectively eliminate dirt. In moisturizing mode, the device uses negative ions to refresh and nourish your skin, restoring its vitality and youthful appearance.

Perfect effect of high temperature

When the device is in massage mode, it affects your face with a temperature of 45°. Such hot compresses open the pores and stimulate the circulation. With Anlan you will treat yourself to a real home SPA and enjoy a well-groomed, healthy, smooth complexion.

EMS massage for more collagen

Choose the EMS massage mode to subject your skin to the action of microcurrents, which contribute to increased collagen production. As a result, your skin becomes more supple and smooth. Anlan Waterproof Ultrasonic Peeling Device will help you regain a youthful, fresh, stunning appearance.

Stylish, ergonomic, practical

Made of stainless steel, the device's tip is safe for the skin and perfectly fits the shape of your face. The ergonomic design makes the product incredibly comfortable to use. The casing is made of antibacterial ABS plastic, which makes it durable and safe and hygienic for you. Moreover, the device is IPX5 waterproof, so you can use it also in the bathroom.
