Air Fryer Bear A19A (green)

Prepare tasty and healthy food with the Bear A19A greaseless fryer. With this fryer, you can say goodbye to deep frying while still enjoying juicy and crispy food. Bear A19A uses hot air, which makes the food you cook in it low-calorie and easy to digest. The practical temperature and time dials make it easy to use and with a 3 litre capacity, you can prepare food for up to 4 people. The A19A is distinguished by the power of 1350 W, temperature regulation from 80 to 200°C and a modern design.

Tasty and healthy

The Bear A19A fat-free fryer uses the hot air circulation function to ensure that the food being prepared is heated evenly from all sides and is therefore juicy on the inside and crispy on the outside. The fryer not only enables fat-free frying of fries, but also the preparation of chicken, fish, prawns or pies.

Fast operation and convenient handling

Power of 1350 W translates into rapid heating and smooth cooking. The fat-free fryer is easy to use thanks to practical knobs for adjusting temperature and time. Thanks to this, you do not need to know how long and at what temperature to prepare a particular dish - a glance at the device is enough. This is the perfect solution for those just starting out with cooking.

Well thought-out design

The Bear A19A fat-free fryer is designed to ensure maximum safety and comfort. The fryer basket has been coated with a non-stick coating, plus you can wash it under running water without worry. The handle is non-slip and does not get hot, while the cooling system ensures effective heat distribution.

Modern and elegant

Bear A19A stands out for its modern design and extremely stylish appearance. The rounded shape and golden elements form an elegant whole, allowing the appliance to become the highlight of your kitchen. The visual effect goes hand in hand with functionality - the fryer automatically pauses when the food basket is removed and resumes operation when you put it back in.
