Wireless controler GameSir T4 Cyclone (white)

#### GameSir T4 Cyclone Wireless Controller (White)

Enhance your gaming experience with the T4 Cyclone wireless gaming controller, equipped with innovative Full Hall Effect sensors that eliminate drift issues. It features 2 programmable macro buttons and dedicated software for customization. The device supports 3 different connection methods and is compatible with multiple platforms. It also allows motion control for a more immersive experience. Additionally, the multifunctional M button enables convenient control, and the dedicated app opens the door to new possibilities. Conquer the virtual world with GameSir!

#### Smooth Operation and Hall Effect

The T4 Cyclone controller is equipped with Hall Effect joysticks designed for precision and durability, with a lifespan of up to 5 million cycles. The use of specially optimized algorithms ensures reliable performance. The controller also offers precisely tuned analog triggers, also utilizing the Hall Effect, providing accuracy up to 0.1mm. As a result, you can confidently compete in virtual races and enjoy smooth gameplay.

#### 3 Connection Methods and Wide Compatibility

The T4 Cyclone model offers 3 connectivity options: via Bluetooth, using a wireless adapter (not included), or a USB-C port, providing flexibility and ease of switching between devices. The controller is compatible with desktop computers, Switch consoles, and devices

running on iOS or Android systems. You can seamlessly play games on various platforms.

#### Immersive Gameplay

Take your gaming experience to a new level with the T4 Cyclone controller, which you can control through motion! Tilt, shake, or rotate the device to fully immerse yourself in your favorite Switch games. Interactive control makes every action in the game feel more realistic and engaging. Ready to be at the center of exciting events? It's possible with GameSir!

#### User-Friendly

With the multifunctional M button, you can efficiently switch between various functions, from trigger mode to joystick mode. There is also the option to adjust vibration intensity and the ABXY button layout. With GameSir, every aspect of the game is under your full control!

#### Customization Possibilities

Expand your capabilities with 2 programmable macro buttons located on the back of the T4 Cyclone controller. You can assign specific functions to them, making it easy to perform even the most complex combinations of moves. You also have the GameSir app at your disposal, where you can customize button functions, set the joystick dead zone, trigger range, vibration intensity, and much more.

#### Included in the Package:
