

Set transmitter + receiver FlySky FS-i6s + iA6B

Set transmitter + receiver FlySky FS-i6s + iA6B

Ref: 5907489604345

FlySky FS-i6S + FS-iA6B

The FS-i6s transmitter and FS-iA6B receiver provide a 10-channel digital proportional RC system. It provides excellent protection against interference while maintaining low power consumption and high reliability.

Low-voltage warning function

Each transmitter and receiver has its own unique ID

3 inch touchscreen interface created for control convenience

Uses 2.4 GHz AFHDS 2A digital, proportional and computerised system

Free software updates available online to always use the current system

Switchable control mode for comfortable transmitter stick control

Low energy consumption

The system has been constructed using highly sensitive components with low power consumption. It retains the high sensitivity of the receiver while consuming approximately one-tenth the power of a standard FM system, significantly extending battery life.

Two-way communication

The FS-i6S features telemetry, capable of sending as well as receiving data which means that each transmitter can receive data such as

temperature, altitude and information from many other types of sensors, servo calibration and i-BUS operation.

Multi-channel frequency

The frequency bandwidth varies between 2.4055 GHz and 2.475 GHz, divided into 140 channels. Each transmitter jumps between 16 channels to reduce interference from other transmitters.

Omni-directional antenna

The high quality omni-directional antenna reduces, interference while using less power and maintaining a reliable connection.

Unique ID recognition system

Each transmitter and receiver has its own unique identifier. Once connected, the devices will only communicate with each other, making it impossible for other systems to accidentally connect or interfere with the system.

Model

FS-i6S + iA6B

Dimensions

179 x 81 x 161 mm

Number of channels

6

Stick sensitivity

4096

Antenna length

26 x 2 mm (dual antenna)

Weight

411 g

Model type

Quadcopter

Bandwidth

500 KHz

Power input

4.2V - 6.0V

Certifications

CE, FCC ID : N4ZFLYSKYI6S

Preço:

€ 69.50

Modelismo, Apparatus, Transmitters, Air transmitters
