

Electric Vehicle charger cable Choetech ACG13 22 kW (white)

Ref: 6932112105769

Electric Vehicle charger cable Choetech ACG13 22 kW (white)

Choetech ACG13 22 kW electric car charger cable (white).

Choetech's ACG13 cable is the perfect solution for electric car charging. It features an IP55 waterproof rating, which translates into excellent resistance to moisture and dust. Note, however, that it is recommended to avoid its use during heavy rains. The cable has a UL94 V-0 fire rating, with a rated power of 22 kW, a rated voltage of 480V and a rated current of 32A. It can withstand voltages up to 2000V and operates in a temperature range of -35°C to 50°C. The expected life of the cable is more than 10000 times of plugging in and out. In addition, the cable can withstand a fall from 1 meter and a vehicle weighing 2 tons rolling over it.

Water and fire resistance class

The Choetech ACG13 charger cable is designed to last in a variety of conditions. It has been awarded an IP55 waterproof rating, which indicates that it is resistant to moisture and dust, although it is not recommended for use in heavy rainfall. What's more, the UL94 V-0 fire resistance rating underscores its excellent performance against fire. All these features ensure that the cable will maintain its performance and guarantee safety, even in demanding weather conditions.

Effective technical parameters

The ACG13 cable is equipped with optimal technical parameters that contribute to its effective performance. Rated power of 7 kW, rated voltage of 250V and rated current of 32A make it a robust and efficient solution for charging electric vehicles. Operation in a temperature

range of -35°C to 50°C, and the ability to withstand a voltage of 2,000V, underscore the cable's flexibility and reliability in a variety of use conditions.

Durability

The ACG13 cable stands out not only for its efficiency and durability, but also for its impressive mechanical life. The ability to be plugged and unplugged repeatedly, estimated at about 10000 times, confirms the long-lasting purpose of the device. The cable's design can withstand a fall from a height of 1 meter and the passage of a vehicle weighing 2 tons. These aspects not only preserve efficiency, but also make the cable an extremely practical tool for charging electric vehicles.

Instructions

□ Brand

□ Choetech

□ Model

□ ACG13

□ Color

□ White

□ Length

□ 5000±100mm

□ Rated power

□ 22KW

□ Rated voltage

□ 480V

□ Rated current

□ 32A

□ Insulation resistance

□ >100mΩ

□ Rated voltage

□ 2000V

□ Contact impedance

□ 0.5mΩ

□ Terminal temperature rise

□ 10000 times

□ Influence of external force

□ withstands a drop of 1 meter and rolling of a 2t vehicle

□ Degree of protection

□ IP55

□ Fire resistance level

□ UL94 V-0
